California Department of Public Health
Rape Prevention and Education Program:
A Public Health Approach to Sexual Violence

CALCASA Statewide Conference
June 21, 2016
Sacramento, CA

This training is supported by the California Department of Public Health, Safe and Active Communities Branch, Rape Prevention and Education Program, funded by the Centers for Disease Control and Prevention, National Center for Injury Prevention and Control.
By the end of this session, participants will be able to:

- Understand the current priorities of the California Department of Public Health (CDPH), Rape Prevention and Education (RPE) Program;
- Identify the current public health principles being utilized and strengthened in current local RPE programs; and
- Understand eligibility and timelines of the future Request for Applications (RFA) funding process.
Agenda

• Introductions
• Movement to End Sexual Violence
• Overview of the CDPH RPE Program
• RPE Best Practices
• Eligibility and Timelines for future CDPH RFA
• Resources and Tools to support the application process
Presenter Introductions

• Nancy Bagnato, MPH, Chief
  State and Local Injury Control Section
  Safe and Active Communities Branch
  California Department of Public Health

• David S. Lee, MPH
  Director of Prevention Services
  California Coalition Against Sexual Assault

• Jessie Towne-Cardenas
  Consultant
  California Coalition Against Sexual Assault
Movement to End Sexual Violence
Describe how you see the work of rape prevention as part of a movement to end sexual violence.
Primary prevention of DV/TDV/SV and ending intersecting forms of oppression are inextricably linked.

- Primary prevention promotes social justice to address the intersecting systems of oppression and inequity that underlie violence in relationships and society.
- Primary prevention initiatives must apply an understanding of the roles of gender, gender norms, and gender inequality as contributors to DV/TDV/SV. This gender analysis should address the intersections of privilege and oppression based on race, class, culture, age, gender, sexuality, and abilities.
Primary prevention initiatives are a part of a much bigger movement that is a part of many movements.

- Primary prevention of DV/TDV/SV is a vital stream within the broader movement to address DV/TDV/SV and violence against women and girls.
- The movement to end DV/TDV/SV is a vital current among many evolving movements for social and environmental justice.
Move to End Violence

MOVE TO END VIOLENCE
a program of the NoVo Foundation
Overview of the CDPH RPE Program
Background

• Funded through the National Centers for Disease Control and Prevention (CDC), National Center for Injury Prevention and Control;

• Adherence to public health approach, Social-Ecological Model and Principles of Effective Prevention;

• Build capacity of local rape crisis centers in implementing evidence-informed, sexual violence primary prevention programs; and

• Currently fund 33 local rape crisis centers as a result of a competitive RFA process in 2014.
Fundamentals of CDPH RPE Program

- Prevent first-time perpetration and victimization (primary prevention) through population-based approaches;
- Reduce modifiable risk factors while enhancing protective factors;
- Use the best available evidence when planning, implementing, and evaluating programs;
- Incorporate behavior and social change theories into prevention programs; and
- Evaluate prevention efforts and use results to improve future program plans, identify measurable outcomes, and share best practices.
Goals for CDPH RPE Program

- CDPH RPE Program Plan with a logic model, goals and measurable outcomes;
- CDPH RPE Guidelines revised to reflect research-informed best practices;
- Refined and strengthened evidence-informed strategies and model programs; and
- Strategy-specific logic models, work plans, and measurable outcomes for local programs.
Why are these goals important?

• Align with CDC direction, priorities and funding guidelines;
• Structured to create a statewide program based on collective actions and measurable outcomes;
• Ensures our efforts are based on research and evidence that will create real change; and
• Creates a vision for preventing sexual violence in California that can be shared with other stakeholders and key policy makers.
What comes to your mind when you think of “best practice’?
Key elements of best practice for CDPH RPE program

- Community-centered
- Collect and use SV surveillance or other sources of data
- Comprehensive primary prevention
- Informed by an understanding of risk and protective factors
- Evidence-informed
- Roadmap
- Developed using the Principles of Prevention
Community Centered

- The program should be relevant, appropriate, and respectful to the community in which it is to be implemented. Community centered programs are socio-culturally relevant, relevant to community experience, appropriately timed for population (community readiness and developmental stage) and helpful to community resiliency. A community-centered program is designed for appropriate program audiences and implementation settings, including cultural and other diversity.
Collect and Use SV surveillance or other sources of data

- To inform prevention strategy, understand intended audience and evaluate prevention efforts (to indicate about SV trends, priority populations and where to focus efforts).
Comprehensive Primary Prevention

• Use comprehensive Primary Prevention strategies supported by work at different levels of the Social Ecological Model or Spectrum of Prevention.
Primary Prevention

- Any action, strategy or policy that prevents sexual violence from *initially occurring*. 
Ecological Model
The Spectrum of Prevention

- Influencing Policy & Legislation
- Changing Organizational Practices
- Fostering Coalitions & Networks
- Educating Providers
- Promoting Community Education
- Strengthening Individual Knowledge & Skills
Risk and Protective Factors

• **Informed by an understanding of risk and protective factors that facilitate and inhibit SV.**

**Individual Risk Factors**
- Alcohol and drug use
- Delinquency
- Empathic deficits
- General aggressiveness and acceptance of violence
- Early sexual initiation
- Coercive sexual fantasies
- Preference for impersonal sex and sexual-risk taking
- Exposure to sexually explicit media
- Hostility towards women
- Adherence to traditional gender role norms
- Hyper-masculinity
- Suicidal behavior
- Prior sexual victimization or perpetration

**Community Risk Factors**
- Poverty
- Lack of employment opportunities
- Lack of institutional support from police and judicial system
- General tolerance of sexual violence within the community
- Weak community sanctions against sexual violence perpetrators

**Societal Risk Factors**
- Societal norms that support sexual violence
- Societal norms that support male superiority and sexual entitlement
- Societal norms that maintain women's inferiority and sexual submissiveness
- Weak laws and policies related to sexual violence and gender equity
- High levels of crime and other forms of violence

**Relationship Risk Factors**
- Family environment characterized by physical violence and conflict
- Childhood history of physical, sexual, or emotional abuse
- Emotionally unsupportive family environment
- Poor parent-child relationships, particularly with fathers
- Association with sexually aggressive, hypermasculine, and delinquent peers
- Involvement in a violent or abusive intimate relationship

**Protective Factors for Perpetration**
Protective factors may lessen the likelihood of sexual violence victimization or perpetration by buffering against risk. These factors can exist at individual, relational, community, and societal levels. The few protective factors identified by researchers to date are listed below. Research in this area is ongoing.

- Parental use of reasoning to resolve family conflict
- Emotional health and connectedness
- Academic achievement
- Empathy and concern for how one's actions affect others

---

Evidence-Informed

- Evidence-informed and include a **theory** of how program activities will result in change. Program should be based in sound research and logic and examine the connection between a theory base, evaluation and desired outcomes or change.
## Logic Model

<table>

Principles of Effective Prevention

- Developed using the Principles of Effective Prevention: Programs should be competently implemented to meaningfully effect change. Programs should employ varied teaching methods and consider multiple styles of learning. Programs should include sufficient dosage, foster positive relationships and be implemented by well trained, well supported, and competent staff.
10 Principles of Effective Prevention Programs/Strategies

1. **Comprehensive**: strategies address risk and protective factors for sexual violence at multiple levels of the Ecological Model or Spectrum of Prevention.

2. **Varied teaching methods**: multiple strategies that increase awareness and understanding as well as enhance and build new skills.

3. **Sufficient dosage**: exposure to enough of the intervention to produce the desired effect (i.e. multiple sessions). Research shows that 7-9 “doses” are needed to affect changes in attitudes and behaviors.

4. **Theory driven**: strategies that have a scientific justification or logical rationale for why they should work.

5. **Positive relationships**: strategies that promote strong positive relationships between children/youth and adults, youth to youth, and adult to adult.
6. **Appropriately timed**: strategies are initiated early enough and at the appropriate developmental time to have an impact on the development of positive and negative behaviors.

7. **Socioculturally relevant**: tailored to the community and cultural norms, beliefs and practices; inclusion of community representatives in planning and implementation phases.

8. **Outcome evaluation**: systematic measurements that can document how well the intervention works.

9. **Well-trained staff**: programs are implemented by staff that are sensitive, competent, and sufficiently trained, supported, and supervised.

10. **Evidence-based**: efforts that are informed by the best available research or expertise.
Maximizing effectiveness

- **Community-centered**: Program should be relevant, appropriate, and respectful to the community in which it is implemented.

- **Comprehensive**: Program should include activities on multiple levels of the social ecology.

- **Informed by evidence**: Program should be based on sound research and logic.

- **Well implemented**: Program should be competently implemented to meaningfully effect change.
Community-centered

- Socio-culturally relevant
- Relevant to community experience
- Appropriately timed
- Helpful
Informed by evidence

- Theory Driven
- Outcome evaluation
- Why do you think this will make change?
Comprehensive
Well implemented

- Varied Teaching Methods
- Sufficient Dosage
- Positive Relationships
- Well trained staff
Key elements of best practice for CDPH RPE program

- Community-centered
- Collect and use SV surveillance or other sources of data
- Comprehensive primary prevention
- Informed by an understanding of risk and protective factors
- Evidence-informed
- Roadmap
- Developed using the Principles of Prevention
CDPH RPE Grouping

- Working in Middle Schools (NSVRC)
  - Shifting Boundaries
- Working in High Schools (NSVRC)
- Working in Colleges (CALCASA)
- Working with Men & Boys (TAASA)
- Working with Women & Girls (Sadie Nash)
- Community Organizing (Movement Strategies Center)
- Community Mobilization (Close to Home)
Eligibility and Timelines for Future CDPH Request for Applications (RFA)
Applications will be accepted from all local rape crisis centers currently funded by the Governor’s Office of Emergency Services for rape crisis services.

All applicants must have the ability to dedicate a minimum of one (1) full-time equivalent (FTE) staff person for prevention activities.
CDPH RPE Program RFA Timelines (tentative)

- **RFA Release:**
  - February 2017

- **Contract Period:**
  - February 1, 2018 – January 31, 2022

www.PreventConnect.org
Welcome to The Hub. The Hub is a training and technical assistance tool by the California Coalition Against Sexual Assault (CALCASA) for staff who work under a California Department of Public Health (CDPH) Rape Prevention and Education (RPE) contract.

The Hub is currently under construction, but you can already access resources to support RPE work, materials from past trainings and web conferences, and forums you can use to communicate with one another. Soon, the Hub will include eLearning courses on primary prevention, CDPH RPE, and more. These courses will be a great primer for new RPE staff members and will reinforce knowledge and skills for more experienced staff.

Past CALCASA Trainings and Web Conferences

Below are links and downloads for previous RPE trainings and web conferences conducted by CALCASA. They are listed in reverse chronological order.

- News forum
- January 2016 Trainings
- 2015-09 Training on Anti-Oppression Practice
- 2015-07 Recording: Introducing the Hub web conference
- 2015-07 Slides: Introducing the Hub web conference
- 2015-06 Training & Networking Meeting
- 2015-05 Recording: RPE Reporting Requirements web conference
- 2015-05 Slides: RPE Reporting Requirements web conference
How to Access the Hub

• If you do not have an account on www.learn.preventconnect.org, please create an account.
• Send your username to hub@preventconnect.org
• We will notify you when we have given you access to the Hub.
For more information

• For information on the CDPH RPE Program, contact Nancy Bagnato at nancy.bagnato@cdph.ca.gov

• For information on RPE Program resources, contact Jessie Towne-Cardenas at jessie@arboretagroup.com
Thank you
